Introduction

Hallo dies ist ein Test.

ltw_election_results

`bundeslaendeR::ltw_election_results` returns data frame (tibble if the tibble package is loaded) containing one row per contesting party per election.

Most election results data are provided by the Bundeswahlleiter. A machine-readable version of the Bundeswahlleiter's compiled data contained in the -periodically published- pdf available here (<https://www.bundeswahlleiter.de/service/landtagswahlen.html>) was kindly provided to me. Election data outside the timeframe covered by Bundeswahlleiter's data provided to me was collected from the states' local election authorities' (Landeswahlleiter) websites. More information on parties and the continuity of parties under different labels was collected by me.

The Bundeswahlleiter's election data in many cases contains differing names for the same party. Both between states (eg. "Christlich Demokratische Union Deutschlands" vs. "Christlich Demokratische Union Deutschlands in Niedersachsen") as well as within states between elections -in many cases due to parties being renamed- ("BÜNDNIS 90/DIE GRÜNEN, Landesverband Hamburg, Grün-Alternative Liste" vs. "BÜNDNIS 90/DIE GRÜNEN, Landesverband Hamburg"). Efforts were made to reconcile both of these inconsistencies by adding two new, harmonized variables identifying parties (`partynome_short` and `partynome`). This harmonized party identifier also covers merging of parties. The `partynome` given to the resulting party (eg. "Linke", "Grüne") is given to the largest of the preceding parties contesting an election unless a smaller party joined a government following the election. The original names provided by the Bundeswahlleiter (and Landeswahlleiters in elections after June 2021) are still available (`partynome_short_bundeswahlleiter` and `partynome_bundeswahlleiter`).

Table 1: Structure of ltw_election_results

State Variables			Election Variables			Party Variables			Party-Election Variables		
Name, Abbreviation, NUTS1 Code			Election date, Size Electorate, Turnout, ...			Names, Abbreviations, several IDs			Vote Count, -Share, Seat Count, -Share, ...		
state	nuts1	...	election_date	turnout	...	partyname_short	ches_id	...	party_vshare	party_seat_count	...

NI	DE9	...	2012-12-16	0.560	...	Party D	004	...	0.50	46	...

Table 2: State-level Variables

state	nuts1	state_name_de	state_name_en
BA	NA	ehemaliges Land Baden	former state Baden
BB	DE4	Brandenburg	Brandenburg
BE	DE3	Berlin	Berlin
BW	DE1	Baden-Württemberg	Baden-Württemberg
BY	DE2	Bayern	Bavaria
HB	DE5	Bremen	Bremen
HE	DE7	Hessen	Hesse
HH	DE6	Hamburg	Hamburg
MV	DE8	Mecklenburg-Vorpommern	Mecklenburg-Vorpommern
NI	DE9	Niedersachsen	Lower-Saxony
NW	DEA	Nordrhein-Westfalen	North Rhine-Westphalia
RP	DEB	Rheinland-Pfalz	Rhineland-Palatine
SH	DEF	Schleswig-Holstein	Schleswig-Holstein
SL	DEC	Saarland	Saarland
SN	DED	Sachsen	Saxony
ST	DEE	Sachsen-Anhalt	Saxony-Anhalt
TH	DEG	Thüringen	Thuringia
WB	NA	ehemaliges Land Württemberg-Baden	former state Württemberg-Baden
WH	NA	ehemaliges Land Württemberg-Hohenzollern	former state Württemberg-Hohenzollern

Election Results Variables

state

State Abbreviation

ISO 3166-2:DE-code of the state; including BA for the former state of Baden, WH for the former state of Württemberg-Hohenzollern and WB for the former state of Württemberg-Baden.

nuts1

NUTS1 Code of State

NUTS1 code of state. NA for former states Baden, Württemberg-Baden, Württemberg-Hohenzollern.

state_name_de

German Name of State

German name of the state.

state_name_en

English Name of State.

English name of the state.

state_election_
term

Election Term of State

Election term in the state. Counts up from 1.

election_date

Election Date

Date of the election. ISO 8601 or R-Date format.

election_id_
bundeswahlleiter

Election ID Bundeswahlleiter

Specific election_id as denoted by the Bundeswahlleiter. Note that BA, WH and WH are named as BW and the number counts down. NA for cases taken from Landeswahlleiters (ie elections after ST 2021).

election_remarks_
bundeswahlleiter

Election Remarks Bundeswahlleiter

Remarks on the election as given by the Bundeswahlleiter.

electorate

Size of the Electorate

Number of eligible voters. For more totals also see the last three columns.

number_of_voters

Number of Voters

Number of voters turning out. For more totals also see the last three columns.

One missing observation: 1946 HB election.

turnout

Turnout

Turnout. Share of eligible voters turning out.

One missing observation: 1946 HB election.

valid_votes

Valid Votes

Number of valid votes. Does not have to be equal to the number of ballots cast, as sometimes a ballot contains multiple votes! For more totals also see the last three columns.

total_seats_
parliament**Total Seats in Parliament**

Total number of members of the newly elected Landtag.

female_party_
seats_available

Number of female MdLs available per party

Denotes whether information on the no. of female members of the Landtag per party is available for this election. Note that for parties not elected to the new Landtag party_female_mps always is.na() == TRUE.

total_female_
mps_parliament

Number of Female MPs in Parliament

Number of newly elected female MPs.

partyname_short

Abbreviated Party Name

Harmonized abbreviation of the party's name. 372 unique parties.

partyname

Party Name

Harmonized name of the party. 372 unique parties.

partyname_short_
bundeswahlleiter

Party Name Abbreviation from Bundeswahlleiter

Partyname abbreviation as documented by the Bundeswahlleiter. 459 different abbreviations.

partyname_
bundeswahlleiter

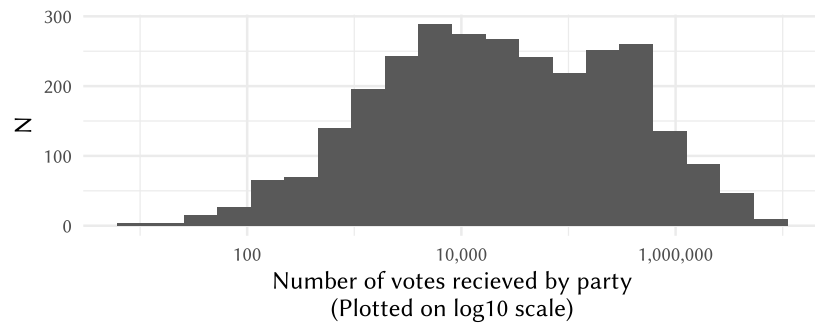

Party Name from Bundeswahlleiter

Partyname as documented by the Bundeswahlleiter. 495 different names.

party_vote_count

Party Vote Count

Number of votes recieved by the party.

party_vshare

Party Vote Share

Share of votes recieved by the party.

party_seat_count

Party Seat Count

Number of seats recieved by the party.

party_sshare

Party Seat Share

Share of seats recieved by the party.

Share of seats recieved by the party
(1013 parties without seats not plotted)

party_female_mps

Number of female MPs from party

Number of female MPs elected for the party. Note that for parties not elected to the new Landtag party_female_mps always is.na() == TRUE.

wzb_govelec_id

WZB DD GovElec ID

If available, MR-Code of the party in the internal govelec database of the WZB department Democracy and Democratization (**wzbDatabasePartiesElections2021**). These party IDs are chiefly based on party IDs from Mackie and Rose (1991).

ches_id

CHES ID

If available, ID of the party in the Chapel-Hill Expert Survey (Jolly et al. 2022).

partyfacts_id

PartyFacts ID

If available, ID of the party in the partyfacts database (Döring and Regel 2019).

decker_neu

Chapter Parteienhandbuch

Denotes, whether the Handbuch der deutschen Parteien (3. ed.) by Decker and Neu (Decker and Neu 2018) has a chapter on the party.

url_info

URL with additional info on the party

URL to informaton on the party on the web. Can contain multiple URLs!

party_remarks_
stelzle**Party remarks Stelzle**

Remarks on the party by me.

party_remarks_ bundeswahlleiter	Party remarks Bundeswahlleiter Remarks on the party as listed by the Bundeswahlleiter.
------------------------------------	--

gueltige_stimm -zettel_hh_hb	Gültige Stimmzettel HH and HB Messy totals.
---------------------------------	---

gesamtstimmen_by	Gesamtstimmen BY Messy totals.
------------------	--

ausgefallene_ stimmen_be	Ausgefallene Stimmen BE Messy totals.
-----------------------------	---

abgegebene_ stimmen_hh	Abgegebene Stimmen HH Messy totals.
---------------------------	---

ungueltige_ stimmen_except_ hh_hb	Ungültige Stimmen except in HH and HB Messy totals.
---	---

ungueltige_ stimmzettel_hh_hb	Ungültige Stimmzettel in HH and HB Messy totals.
----------------------------------	--

ltw_election_results_and_governments

This codebook only concerns variables specific to the `ltw_election_results_and_governments` dataset. For further variables please refer to the `ltw_election_results` dataset's codebook.

`ltw_election_results_and_governments` returns a data frame (tibble if the `tibble` package is loaded) containing both election results as well as linked information on governments in the German states. Each row contains information on one party during the time in office of one cabinet.

Election results data are provided by the Bundeswahlleiter. A machine-readable version of the data in the pdf available here (<https://www.bundeswahlleiter.de/service/landtagswahlen.html>) was kindly provided to me. Election data outside the timeframe covered by Bundeswahlleiter's data provided to me was collected from the states' local election authorities' (Landeswahlleiter) websites. More information on parties and the continuity of parties under different labels was collected by me. Information on Governments mainly taken from the replication data of Linhart, Eric, Franz U. Pappi und Ralf Schmitt (2008): Die proportionale Ministerienaufteilung in deutschen Koalitionsregierungen: Akzeptierte Norm oder das Ausnutzen strategischer Vorteile?, *Politische Vierteljahresschrift* 49(1): 46-67. To be found online here: <https://www.tu-chemnitz.de/phil/politik/pspi/forschung/daten.php>. Information outside the timeframe of Linhart et al. as well as information on the names and party affiliations of the Ministerpräsidenten was collected by me, mainly from German Wikipedia.

Governments Variables

gov_no_within_
legterm

Number of cabinet within legislative term

Number of cabinet within legislative term (i.e. First cabinet in the 1990-1994 legislative term of state X).

gov_id

Government ID

Unique ID of government. Taken from Linhart et al. However, this ID is not counting up within state by time. In cases where Governments were missing from Linhart et al. before the timeframe covered by Linhart et al. (eg. in Berlin) these earlier governments have an higher ID than later cabinets contained in Linhart et al. data.

state_gov_ number

Number of government in state.

Number of government in state.

gov_party

Government Party

Boolean whether the party was a cabinet party. Note: There is a single cabinet where no party is marked as part of the cabinet: Heinrich Welsch's caretaker government in the Saarland (at the time not yet a member of the FRG) in 1955.

nmin_party

Number of Ministers of Party

Number of Ministers of Party.

gov_source

Government Source

Source of the information on the government. Either Linhart et al. or the URL of the German Wikipedia Page containing information on the cabinet.

gov_remarks_
stelzle**Governments remarks Stelzle**

My remarks on governments.

minister_president

Name of minister president

Name of minister president.

mp_party

Minister President's Party

Party of the minister president. partyname_short format used. Note: There is a single cabinet with an independent minister president: Heinrich Welsch's caretaker government in the Saarland (at the time not yet a member of the FRG) in 1955.

is_mp_party

Is MP Party?

the governments minister president from this party? Note: There is a single cabinet where the minister president is not part of any party: Heinrich Welsch's caretaker government in the Saarland (at the time not yet a member of the FRG) in 1955.

link_polidoc_parties and link_polidoc_governments

link_polidoc_parties and link_polidoc_governments provide easy links of ltw_election_results or ltw_election_results_and_gov with party manifestos and coalition agreements made available from polidoc.net - The Political Documents Archive (Benoit, Bräuninger, and Debus 2009; Gross and Debus 2018; Pappi and Seher 2014, 2009; for the codebook see Bräuninger et al. 2018). While file names from polidoc.net follow a naming pattern (partyID.stateID.year.1.number of party manifesto for election), the provided links make joining the data easier.

Note that polidoc.net provides a manifesto for the Neue Liberale in the HB 2015 election (41441.005.2015.1.1). Since the party withdrew it's candidacy before the election and is thus not included in the election results in ltw_election_results, the manifesto id is not included in link_polidoc_parties.

Note that polidoc.net provides a coalition agreement between the SPD and the Greens following the 2008 HE election (41001.006.2008.1.1). Since this potential coalition under leadership of SPD politician Andrea Ypsilanti never came to be due to several SPD MPs opposing the red-green minority cabinet being externally supported by Die Linke the coalition agreement can't be matched with a government in ltw_election_results_and_gov and is thus not included.

Polidoc Link Variables

state	State Abbreviation ISO 3166-2:DE-code of the state; including BA for the former state of Baden, WH for the former state of Württemberg-Hohenzollern and WB for the former state of Württemberg-Baden.
election_date	Election Date Date of the election. ISO 8601 or R-Date format.

polidoc_filename
and
polidoc_filename_2
in link_polidoc_
parties

Polidoc File Name of Party Manifesto

File name of state party manifesto (or 2nd manifesto if available) available in The Political Documents Archive (polidoc.net).

polidoc_filename
in link_polidoc_
governments

Polidoc File Name of Coalition Agreement

File name of coalition agreement available in The Political Documents Archive (polidoc.net).

de_states_grid_4x4()

de_states_grid_4x4() exports a data frame containing state IDs, german and english state names and approximate state locations on a 4x4 grid. The exported data frame can be used to approximately plot state-facets in their approximate locations using ggplot2 extension geofacet (Hafen and Schloerke 2020).

Please find a comparison of state locations and the grid layout below.

Example Code:

```
library(bundeslaendeR)
library(tidyverse)
library(geofacet)

turnout_plot <-
ltw_election_results %>%
  select(state, election_date, turnout) %>%
  distinct() %>%
  filter(!(state %in% c("WB", "BA", "WH"))) %>%
  filter(!is.na(turnout)) %>%
  ggplot(aes(x = election_date, y = turnout)) +
    geom_line() +
    facet_geo(grid = de_states_geofacet_grid_4x4(linebreak = T),
              facets = ~state, label = "name") +
    scale_y_continuous(limits = c(0,1),
                       labels = scales::percent) +
    theme(strip.text = element_text(face = "bold")) +
    labs(x = NULL, y = "Turnout")
```

Figure 1: Comparison of state location and grid layout

Map data from *geoBoundaries* (Runfola et al. 2020).
